Portfolio: <https://urmitheta.vercel.app/>

I've always enjoyed making complex things easier to understand, from board game rulebooks to digital products. Over 7 years, I've grown from writing product content to designing content systems, AI experiences, and governance frameworks that help users and teams.

Driven by systems thinking, I've designed content for both B2B and B2C products, building at the intersection of AI, content, and product design to create experiences that are intuitive, scalable, and human.

SKILLS

- UX writing & content systems
- Information architecture
- Localization
- Accessibility (WCAG)
- Conversation design
- Content engineering
- AI evaluation & governance
- System design

EXPERIENCE & RESPONSIBILITIES

Content Engineer & Content Designer - III

DreamStreet (October 2025 to Present)

- **Designed product content** for a new finance app, including onboarding, payments, FAQs, support emails, and Help Center experiences for Tier 2–4 users.
- **Built AI content workflows**, including prompt libraries and content templates, helping teams create better first drafts and work faster.
- **Designed Veda AI**, defining its personality, conversation flows, guardrails, and fallback responses to build trust and improve the user experience.
- **Created content guidelines**, including voice and tone, terminology, localization, and review processes to keep content clear and consistent across teams.
- **Used UX research and content testing** to improve clarity, solve user problems, and refine the product experience.

Content Designer - III

Dream11 (September 2024 to October 2025)

- **Led clear, accessible, and user-first content** across Dream11 products, improving usability and building customer confidence for **260M+ users**.
 - **Partnered with Product and Design** from discovery to launch, using content to shape user journeys and product decisions.
 - **Built the Dream11 Content Design System**, using systems design that surfaced guidelines, content patterns, past copy, and best practices to help teams create content faster and more consistently.
 - **Helped teams think content-first** through workshops, reusable patterns, templates, and writing guidelines.
 - **Organized content** with taxonomies, labels, and localization standards to improve consistency and comprehension across products.
 - **Applied accessibility, user research, and data** to improve content, reduce friction, and build user trust.
-

Technical writer & UX Writer | CleverTap (January 2023 to August 2024)

- **Designed product content** for a B2B marketing automation platform, including dashboards, notifications, and complex product workflows.
 - **Partnered with Product and Design** to simplify technical features and improve usability for enterprise users.
 - **Maintained a consistent voice and tone** across the product while balancing user needs and business goals.
 - **Contributed to the Content Design System** by documenting writing guidelines, reusable patterns, and best practices.
 - **Tested and refined content** with Product, Design, and Research using user feedback.
 - **Onboarded and mentored new team members**, created interview assessments, and interviewed candidates.
-
