Portfolio: <https://urmitheta.vercel.app/>

I've always enjoyed making complex things easier to understand, from board game rulebooks to digital products. Over 7 years, I've grown from writing product content to designing content systems, AI experiences, and governance frameworks that scale across products and teams.

Driven by systems thinking, I've led content across multiple B2B and B2C products, building at the intersection of AI, content, and product design to create experiences that are intuitive, scalable, and human.

SKILLS

- Content engineering
- UX writing & content systems
- Conversation design
- AI evaluation & governance
- Information architecture
- System design
- Localization
- Accessibility (WCAG)

EXPERIENCE & RESPONSIBILITIES

Content Engineer & Content Designer - III

DreamStreet (October 2025 to Present)

- **Led product content** across onboarding, payments, support, and AI experiences for a new finance app, creating simpler, more trustworthy experiences for **Tier 2–4 users**.
- Built **AI content workflows**, including prompt libraries and reusable templates, **improving content quality and helping teams create faster, more consistent first drafts**.
- Designed **Veda AI**, defining its personality, conversation flows, guardrails, and fallback responses to **build trust, improve response quality, and create a more reliable AI experience**.
- Built **scalable content systems** covering voice, terminology, localization, AI guidelines, and governance to **improve consistency across products and teams**.
- Used **UX research and content testing** to improve clarity, solve user problems, and refine the product experience.

Content Designer - III

Dream11 (September 2024 to October 2025)

- **Led clear, accessible, and user-first content** across Dream11 products, improving usability and building customer confidence for **260M+ users**.
 - Partnered with **Product, Design, Research, and Engineering** from discovery to launch, using content to **influence product decisions** and shape **end-to-end user journeys**.
 - Built the **Dream11 Content Design System**, creating **reusable patterns, governance, writing guidelines, and searchable content libraries**.
 - **Enabled product teams** through workshops, reusable templates, and writing guidelines, helping teams create **more consistent content at scale**.
 - **Organized content** with taxonomies, labels, and localization standards to improve consistency and comprehension across products.
 - **Applied accessibility, user research, and data** to improve content, reduce friction, and build user trust.
-

UX Writer | CleverTap (January 2023 to August 2024)

- **Owned content across multiple product pods** within CleverTap's B2B marketing platform, designing dashboards, onboarding, notifications, and complex product workflows.
 - Partnered with **Product, Design, Engineering, and Documentation** to simplify technical features and improve usability for enterprise users.
 - **Maintained consistent product language** across multiple product areas while balancing user needs, technical complexity, and business goals.
 - Expanded the **Content Design System** through **reusable writing patterns, documentation, governance, and best practices**.
 - Validated content through **research, usability testing, stakeholder reviews, and iterative improvements**.
 - Mentored new writers, created hiring assessments, and interviewed candidates to help grow the content design team.
-
