Portfolio: <https://urmitheta.vercel.app/>

I've always enjoyed making complex things easier to understand, from board game rulebooks to digital products. Over 7 years, I've grown from writing product content to designing content systems, AI experiences, and governance frameworks that help users and teams.

Passionate about systems thinking, I aspire to build at the intersection of AI, content, and product design, creating experiences that are intuitive, scalable, and human.

SKILLS

- UX writing & content systems
- Information architecture
- Localization
- Accessibility (WCAG)
- Conversation design
- Content engineering
- AI evaluation & governance
- System design

EXPERIENCE & RESPONSIBILITIES

Content Engineer & Content Designer – III

DreamStreet (October 2025 to Present)

- Designed end-to-end product content for a new finance app, covering onboarding, payments, FAQs, support emails, and Help Center experiences for Tier 2 to 4 users.
- Built AI-powered content systems, including prompt libraries, localization workflows, and structured content models, empowering Product, Design, Customer Support, Legal, and Compliance teams to create stronger first drafts and maintain a consistent brand voice.
- Designed for finance chatbot – Veda AI, defining its personality, conversation design, compliance guardrails, and fallback flows to increase adoption while delivering

consistent, trustworthy financial guidance.

- Established scalable content governance, creating UX writing guidelines, voice & tone, terminology, and review workflows that enabled cross-functional teams to ship consistent, high-quality content faster.
 - Applied UX research, content testing, and user insights to validate content decisions, improve comprehension, and continuously refine the product's voice for diverse Indian audiences.
-

Content Designer - III

Dream11 (September 2024 to October 2025)

- Led user-first content across Dream11 products, creating clear, accessible experiences for 260M+ users across diverse and multilingual audiences.
 - Partnered with Product, Design, and Research from discovery through delivery, using content to shape UX flows and simplify complex user journeys.
 - Built the Dream11 Content Design System, including content patterns, guidelines, AI tools, and reusable templates that enabled teams to create faster, more consistent content at scale.
 - Defined localization standards, terminology, and content patterns to deliver culturally relevant experiences while maintaining a consistent brand voice across languages.
 - Translated UX research, usability testing, and product insights into content improvements that reduced friction, increased clarity, and strengthened user trust.
-

Technical writer & UX Writer | CleverTap (January 2023 to August 2024)

- Wrote clear copy for dashboards, notifications, and product flows.
 - Onboarded and trained new hires, created interview tests, and interviewed candidates.
 - Maintained a consistent voice and tone across projects while balancing user needs and business goals.
 - Contributed to the content design system by documenting patterns and principles.
 - Tested and refined copy with design, product, and research based on user feedback.
-

Sr. Content writer & Copy writer | Appitsimple (Jun 2021 to Oct 2022)

- Wrote across channels for product, website, blogs, and marketing. Tailoring content to user

intent.

- Improved content performance by analysing clicks, feedback, and metrics, then iterating for results.
 - Created reusable templates, contributed to the style guide, and aligned tone across teams.
 - Guided freelance writers with briefs and reviews to keep blogs clear and consistent.
-

Sr. Content writer | Gateway Group of Companies (Mar 2020 to Mar 2021)

- Wrote blogs and product content for multiple technical products, simplifying complex ideas for wider audiences.
 - Applied AP style guide, SEO, and user-intent writing to make content clear and discoverable.
 - Built a foundation in user-friendly writing and consistent brand messaging.
-
